DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: Page 3, on line 14, "beam"(second occurrence) should be deleted.

Appropriate correction is required.

The abstract of the disclosure is objected to because it is not given on a separate sheet; and this sheet should follow the claims. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 3, 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 2 and 3: on line 2, "said pixels" has no antecedent basis since neither the "one pixel" nor "the more pixels" has been positively recited.

In claims 7 and 8: on line 2, "said selected portions" has no antecedent basis, since neither the "one selected portion" nor the "more selected portions" has been positively recited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Takeda'825 or Takeda'946.

Regarding claim 1, reference should be made: (1) to the pixel of Fig. 18 of '825 patent where the charged particles, the fluid and the polymer wall are represented by numerals 50, 40 and 90, respectively (see also column 9, lines 30-40 and column 22, line 50 to column 23, line 24, for example); and (2) to the pixel of Figs. 3 and 4 of '946 patent where the charged particles, the fluid and the polymer wall are represented by numerals 50, 40 and 30, respectively. See also column 7, lines 34-65, for example.

With respect to claim 5, the circuitry called for in the claim is seen as an inherent limitation in the display device of '825 and '946 patents.

Allowable Subject Matter

The method claims 6 and 8-12 are allowable.

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2, 3, 7 and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
